

Guard

Bags for dangerous goods (UN bags)

Guard protects dangerous goods – you're assured of safety

Safety is an absolute must when handling dangerous goods. Products in packaging groups II and III should be transported in Boxon Guard bulk bags. The Guard series are known as UN bags, since they unconditionally conform to the standards laid down by independent testing institutions.

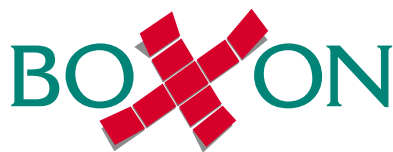

Protection of people and the environment always takes priority when transporting and handling dangerous goods.

The international symbol for dangerous goods  is printed on each individual Guard bag. It serves as both a warning signal for those who handle the bags and also as a confirmation that the bag satisfies current quality standards.

All bulk bags in the Boxon range are available in a Guard version. This means that anti-static properties, extra shape stability and various liners can all be incorporated into bags designed for particular types of dangerous goods.

Basic options for Guard bags

| Design | UN symbol |
|------------------------|-----------|
| PP-uncoated | 13H1 /Y |
| PP-coated | 13H2 /Y |
| PE-liner | 13H3 /Y |
| PP-coated with a liner | 13H4 /Y |
