

# Poly

## Small bags (PE bags)

## Poly is ideal when handling large volumes in smaller packages

Sometimes it is more appropriate to store or transport bulk products in smaller packages rather than bulk bags. For this purpose Boxon has developed a series of small PE bags in the Poly series.

For packaging bulk products intended at consumer purchase, Poly is an ideal choice. Our PE bags have excellent printing qualities, making it possible to apply attractive designs. When a product is to be displayed in shops, often logos and trademarks must be reproduced in line with a company's graphic profile. It must also be possible to print a clear list of contents. Our Poly series fully satisfies these requirements.

Poly is available in a variety of formats, including open plastic bags and valve bags, as well as tube and flat film.
